ABOUT US

Established in 1956, A R Twigg & Son are a leading UK Manufacturer of Funeral and Mortuary equipment.

With Headquarters based in Thatcham Berkshire, we manufacture and supply our own range of products across the UK and to the Irish Republic and have also exported to many other countries. Being a family business allows us to offer in-house knowledgeable staff who are dedicated to providing personal attention, advice and support.

A R Twigg & Son has always had a excellent name within the Funeral Industry and the Brand has continued to grow in both size and the range of products available ever since 1956. Continuous tailoring and perfecting of products ensures we provide each customer with the ultimate assurance of unrivaled quality, reliability and dependability.

With A R Twigg & Son you'll always get honesty, integrity, respect and advice which can be relied upon. Our ethos of continual improvement of our product range means you'll always be buying the best the Industry can offer.

Our reputation has always been built on providing customers with equipment that lasts. Every funeral home in the country has at least one piece of Twigg equipment in it. There is no other Company in the business who can claim that. This is testament to the Twigg range of products and building upon strong foundations that were set out over 60 years ago.

Other Funeral Manufacturers have tried to replicate our products unsuccessfully as our quality cannot be rivaled. We aim to lead the market and set the standard for Funeral and Mortuary equipment.

CHOOSING TWIGGS

Our products are designed specifically for use by Funeral Directors utilising the best quality materials and component parts available. This ensures the product is robust enough for every day use.

Bespoke

Of all the products manufactured by Twiggs at least 75% of those are made bespoke. Every Customer's needs are different and therefore the product the Customer wishes to purchase needs to be different. Listening and understanding the Customer's needs is what we're good at.

Warranty

Since 2017 Twiggs has sold every product with a 3 year warranty (Subject to T&C's). This shows we have a great deal of faith in the product we are manufacturing and producing for you.

Technical support

Twiggs always has someone at the end of the phone who is able to provide help and advice should it ever be required. Every employee knows how to do their job and that of another employee meaning if anyone is away on leave or sickness there is always someone to help.

Parts

We don't make spare trolley component parts for anyone else in the Industry apart from J&J Maintenance. If any of your equipment has been repaired by another third party then the part you have had fitted may well be of inferior quality. This will ultimately affect the safety of the machine and could pose a risk to users of the equipment.

Servicing and maintenance

Twiggs sister Company J&J Maintenance Services has several Mobile Engineers who travel the length and breadth of the British Isles all year round. Providing support and back up to Twiggs both Companies work seamlessly together ensuring you as the Customer always have the safe knowledge someone is always there to help.

J&J Maintenance also have a dedicated Engineer who works in the workshop repairing all of the broken stretchers and other Funeral equipment. This ensures a quick turnaround if something needs that little bit of TLC. They always use OEM parts wherever possible. If these are not available they have commissioned their own pattern parts which are of far better quality to ensure your equipment can continue to be used.

Loan equipment

Our workshop has a full range of Funeral Equipment ready for despatch on loan should any piece of your equipment fail. We have trolleys made by all manufacturer's, stretchers, biers and even an obese Casket Lattice available should the need arise.

Advice

Our advice is free and we will always give you an honest opinion. Believe it or not we are not interested in selling you the latest trolley. We are interested in ensuring the equipment you have suits your needs and is fit for the purpose you need it for. If it is not then we will provide our professional opinion of what would suit your set up best. If your existing equipment can be modified then we will of course help you to do this.

MORTUARY TROLLEY VARIANTS

Twigg Mortuary Trolleys are designed to be used in conjunction with refrigeration racking, coffin storage racks and the loading of vehicles.

All trolley rollers are fitted with stainless steel bearings with a rubber covering. We are the only Manufacturer in the market who use rollers with bearings fitted across the entire product range. The use of bearings in the rollers makes using the trolley very easy and enables the largest of loads to be moved with ease. Twigg rollers are compatible with all makes of Tray runner guides regardless of the manufacturer.

- Options such as handles fitted to the sides of the top bed assist in the movement of the trolley.
- Foot pedals can be fitted to cut down on contamination when working in post-mortem rooms.
- Optional Castor Buffers help to cut down on damage to the working environment.
- Both power driven rollers and wheels are now an option.

Electric 'Underslung Boxes'

Electric 'Black Box'

Electric Thro'Loader with Side Handle

MORTUARY TROLLEY DIMENSIONS

Twigg mortuary trolleys are available in 3 Tier or 4 Tier formats. The Tier format denotes how high the trolley will lift. A trolley is always made 'Bespoke' to suit the requirements of the Customer. Depending on the type of Wheels fitted Twigg trolleys can go as low as 224mm and as high as 1960 depending on variant.

As a standard all trolleys are fitted with 4 braked castors to ensure wherever an Operator is stood at least 2 brakes can be applied. Trolleys can be fitted with or without Buffer Wheels anywhere on the Trolley. If they are fitted on the front two corners the trolley width becomes 735mm. These are fitted here by default but can be removed if required. **Anything is possible with a Twigg trolley!**

**Power Driven Rollers
are now an optional
extra on all our
mortuary trolleys.**

**5 Tier trolleys
are now available!**

THE NEW TWIGG POWER DRIVEN TROLLEY

We are proud to present the 'Ludum mutante' or to you and I the game changer!

The New Twigg Power Driven Trolley is set to take the Funeral and Mortuary Industry by storm.

This brand-new design is the first trolley of its kind in the Funeral, Mortuary and NHS sector. We have listened to our customers and taken ideas from our current range to make this new Twigg trolley the best in the Industry.

Starting from the base upwards we have looked at what the market needed. There was no low-level trolley capable of lifting from 250mm high to 1960mm high. We conquered this by building on our existing low level trolley design to ensure this is a proper 5 tier machine. If the customer utilises our racking it will provide gaps of 375mm per shelf which is deep enough for storage of any tray or coffin.

Secondly, we looked at the power drive system as we needed something better and more reliable than what the competition is offering. We achieved this by sourcing a proven product that is already in use throughout Europe. We have secured exclusivity for the UK market so no other mortuary trolley manufacturer can obtain this power-driven equipment in the UK. No need for expensive patents!

So why is our power drive better? The drive wheel is designed to turn the trolley 360 degrees on its own at the touch of one button. This ensures tight spaces can be easily negotiated. For example, the operator does not need to approach the fridge straight on, they can approach from any angle; a touch of sideways shift and they are then square on to remove a tray or coffin. This saves both time and personal injury from having to align something that is big and heavy.

The drive wheel handle grips work on touch and just need the slightest movement to send the trolley forwards or backwards. This makes the driving experience effortless and extremely easy for those operators of smaller stature. The drive wheel is of solid design so worn out mobility scooter tyres are a thing of the past!

We have redesigned the hydraulic system to ensure the ram is powered in both directions. This always provides the operator with complete control regardless of weight. There is no reliance on gravity facilitating the downward motion of the framework.

If a customer is going to the expense of having power driven wheels and roller then they want a suitable safe working load to match their investment. This is why we have ensured that this trolley has a 400kg/63 stone unit safe working load as standard.

The top bed has been fitted with dual powered rollers which will single handedly pull more than the safe working load. These ensure that the tray or coffin is always in touch with a powered roller. We can provide various options for tray catches, so the tray is not only held in place with this but also the powered roller.

When comparing our trolley against the competitors you need to see if their similar product will do any of the following points?...

...If it does not, which we know it doesn't with any of the points listed, then they cannot be compared as a like for like trolley. The Twigg package offers so much more and with our enviable reliability and reputation of building equipment that lasts, this game changer is a much better trolley overall.

- 1) 400kg/63 stone Safe Working Load as standard.
- 2) 5 Tier trolley offering 255mm closed and 1960mm on full extension.
- 3) Proven Power Drive system facilitates the turning of the trolley 360 degrees by the touch of a button.
- 4) Tight locations can now be negotiated with ease thanks to the powered sideways shift. No requirement to align the trolley square onto a fridge or rack as the sideways motion overcomes this.
- 5) Dual touch sensitive handles ensure minimal effort is required to drive trolley making it effortless. Can be operated single handedly.
- 6) Powerful spring ensures the drive wheel is permanently in touch with the floor surface ensuring grip is always there when you need it most.
- 7) 2x Powered Rollers fitted as standard.
- 8) Each individual powered roller is designed to move a static load more than the safe working load.
- 9) Weighing scales fitted as standard when the trolley is purchased directly from Twiggs.
- 10) Dual acting ram which powers the load hydraulically both up and down providing complete control and confidence for the operator.
- 11) Minimal downtime as whole system designed as plug and play including the drive wheel which can be swapped out in less than 2 minutes, not hours. Solid drive wheel ensures flat or worn-out tyres are a thing of the past helping to keep maintenance costs low.
- 12) 3-Year Warranty as standard.

POWER DRIVEN TROLLEY

Length:	2470mm
Width:	685/735mm
Closed Height:	260mm
Full Extension:	1960mm
Lifting Range:	1700mm

LOW LEVEL TROLLEY

'The Twigg Low Level Trolley' leads the way with being the lowest trolley available on the market today with a closed height of 224mm.

The ethos behind this trolley is to maximise all the Fridge Door aperture space enabling a greater degree of storage options. When it comes to racking design, this trolley has enabled 3 tier fridges to become 4 tier fridges due to its low-level design.

- Available with 100mm, 125mm or 150mm wheel variants to alter the lowest lift height (Closed Height) to suit your requirements.
- Available with both electric & manual pumps.
- Options such as handles can be fitted to the sides of the top bed assist in the movement of the trolley. Foot pedals can be fitted to cut down on contamination when working in post-mortem rooms.

LOW LEVEL TROLLEY

3 Tier with 100mm wheel fitted

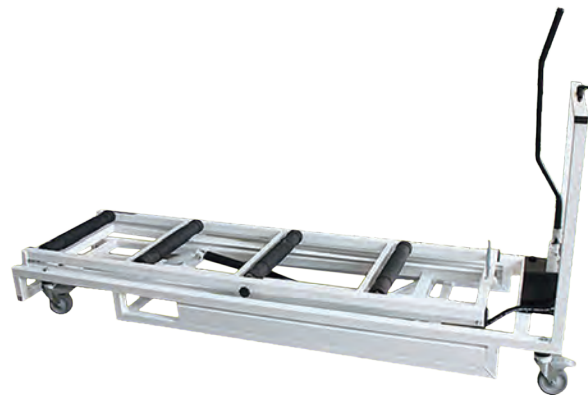

Length:	2020mm
Width:	685mm
Closed Height:	224mm (Depending on wheel fitted)
Fully Extended:	1715mm (Depending on wheel fitted)

4 Tier with 100mm wheel fitted

Length:	2105mm
Width:	685mm
Closed Height:	224mm/254mm (Depending on wheel fitted)
Fully Extended:	1799mm/1829mm (Depending on wheel fitted)

5 Tier with 100mm wheel fitted

Length:	2220mm
Width:	685mm
Closed Height:	224mm/254mm (Depending on wheel fitted)
Fully Extended:	1910mm (Depending on wheel fitted)

ELECTRIC BODY HOIST

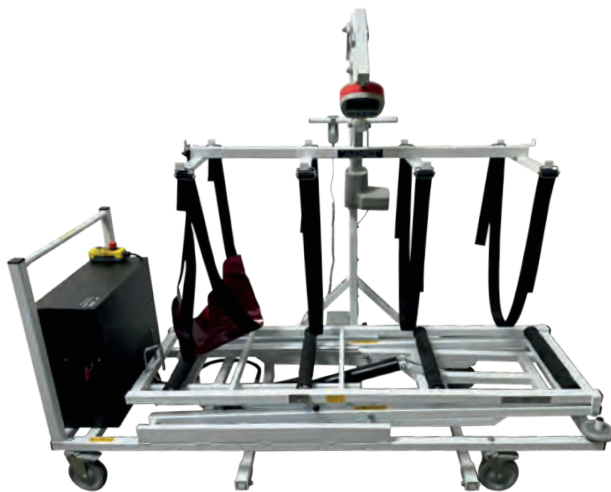

With obesity on the increase, the demand from our Customers for a stronger, portable and more robust Electric Body Hoist was something we could not ignore.

We have utilised our low level base so this hoist is compatible with all makes of trolleys available in the market place. We offer the electronic scale system and head sling as standard fitment.

The scale system has a safe working load of 300kg with scales or 320kg without scales. (The maximum load for the scales is 300kg).

The power system we use is from our popular Universal Loader so we know when we say it will lift 320kg it will lift 320kg! This hoist is available with either a handset or foot pedal operation. The handset makes the operation of the lift in confined spaces very easy as you can stand either side of the hoist whilst operating it. The handset is designed to hook onto the operators handle when not in use.

The Twigg Electric Body Hoist is a must for every Mortuary to ensure back injuries are a thing of the past.

ELECTRIC BODY HOIST

Overall Length:	905mm
Overall Width:	970mm
Height:	1685mm
Weight:	53kg
Safe Working Load:	300kg (with scales) 320kg (without scales)

ELECTRIC EMBALMING TROLLEY

All of our Trolleys can be adapted to enable Embalming to take place. Whether it be an electro operated embalming tilt or just a basic tray resting bar we are able to adapt any of our trolleys to suit your requirements.

We even now provide a trolley with an electric tilt fitted to the top bed. This is proving to be a real success as our unique design allows a seamless up/down operation from the touch of a switch. This unit can be fitted to either the 3 or 4 Tier trolley of which the 4 Tier is capable of reaching shelves at 1930mm high.

The 3 Tier Electric Embalming Trolley shown in these pictures either-side is a mere 1650mm long making it ideal for a small mortuary set up.

Better built,
3 year warranty.
Made bespoke
for your Mortuary.

ELECTRIC EMBALMING TROLLEY

Length:	1650mm
Width:	85mm (not inc buffers)
Closed Height:	400mm
Fully Extended:	1715mm
Safe Working Load:	200kg-450kg

MANUAL EMBALMING TROLLEY & TABLE

The manual hydraulic embalming trolley is available in both 3 and 4 tier formats. The height adjustable bar enables the Operator to decide at what height they wish to work at.

The Twigg manual trolley is practical and easy to use. Available in both mild steel powder coat and stainless steel formats. This trolley is the only one you should be considering.

- The trolley base dimension is 2105mm.
- Width and operating heights are the same as the other manual trolleys on page 7.

The Twigg Embalming Table has been around for many years now and is still made to order today. Operated via a manual hand pump these tables last forever!

With its practical deep tray and proper plug hole these trolleys can be plumbed into existing Mortuary facilities whilst still maintaining the mobile capability. Safe working load is a whopping 320kg!

EMBALMING TABLE

Length: 1980mm

Width: 765mm

Height: 820mm
(Adjustable)

SIDE LOADING MORTUARY TROLLEY

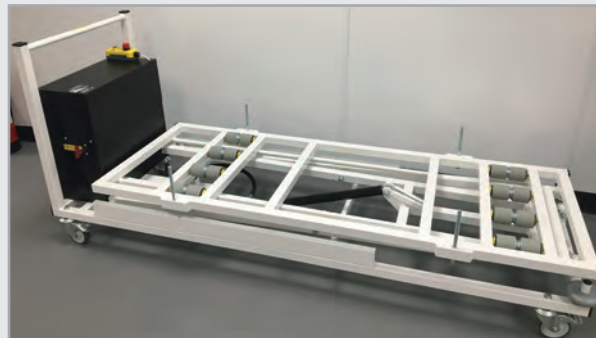

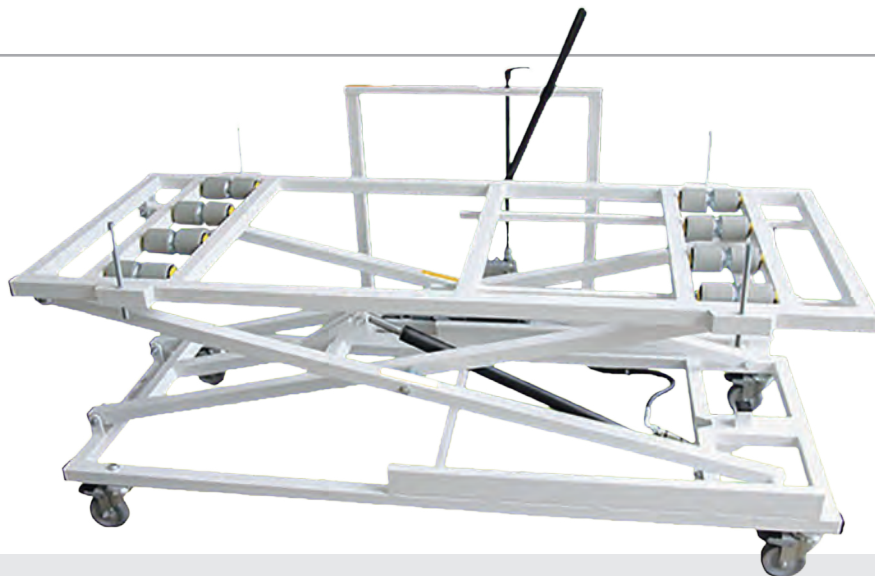

Side Loading Mortuary Trolleys are becoming more and more popular.

Side Loading Trolleys
can be made with an
operators handle on
the side, at the end or
in some cases with
no handle at all!

A side loading set up enables the smallest of rooms to be converted into a Mortuary by utilising side loading equipment.

All of the Side Loading Trolleys we manufacture are based on the end loading versions as seen on the previous pages. The Side Loading Trolleys are again fitted with rubber sleeved stainless bearing rollers. Designed to take both Coffins and Trays alike the side loading trolley is an attractive option.

Side Loading Trolleys are available in the same pump and safe working load configurations. Dimensions and wheel configurations are exactly the same as the 'Mortuary Trolley Dimensions' found on Page 7 in this brochure.

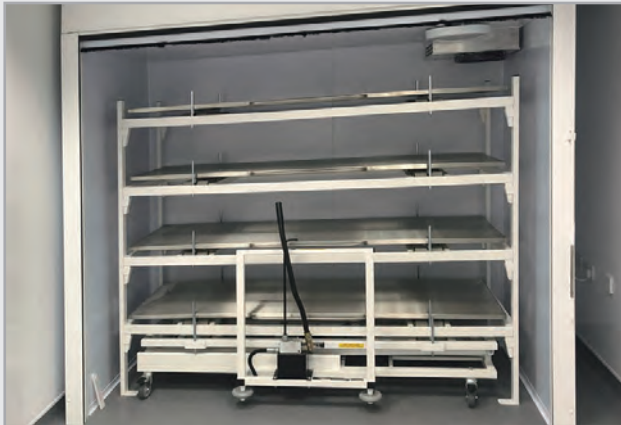

SIDE LOADING RACKING

Available in 2, 3 and 4 Tier formats our side loading racks store both Coffins and Trays alike.

Obstacles are our specialism. Where competitors say it is not possible to build we find solutions. The picture to the top left is one such example at an Independent Funeral Home near Southampton. They are very pleased with their Fridge, Racking and Trolley installation.

- End handle set ups allows storage on either side of the room where the room depth does not permit end loading.
- With an end handle the side loading trolley is stored end ways on with compatible racking in a Coldroom set up.

All racks and trolleys are made bespoke.

MORTUARY ROOM EQUIPMENT

We are able to supply a range of Top Quality items used throughout your Mortuary Room.

We are very selective when it comes to reselling equipment not manufactured by ourselves. This is why we will only supply the Best Products in the Industry.

Walk Cupboards with 1 or 2 doors available

Headblocks

Dignified NHS Headblocks

Combined Sink & Storage Cupboard

Combined Sink & Sluice for Embalming

REFRIGERATION

With so many companies now offering inferior refrigeration products Twigg decided to bring the supply of Mortuary Fridges in house.

Poor advice, equipment and installations by so-called Direct Mortuary Suppliers were some of the horror stories we had heard about.

Our cabinets are sourced from a major high-quality refrigeration company based in the UK that exports globally. So when you buy a Twigg fridge you can be assured of its quality, design and longevity. All of our cabinets are a proven design.

Our electrically operated roller shutter doors do not sweat and cause condensation build up on the outside of the door. This means there is no requirement for an internal curtain which can be unhygienic and awkward to use.

Working together with other suppliers means
your fridge meets your needs.

ADJUSTABLE RACKING

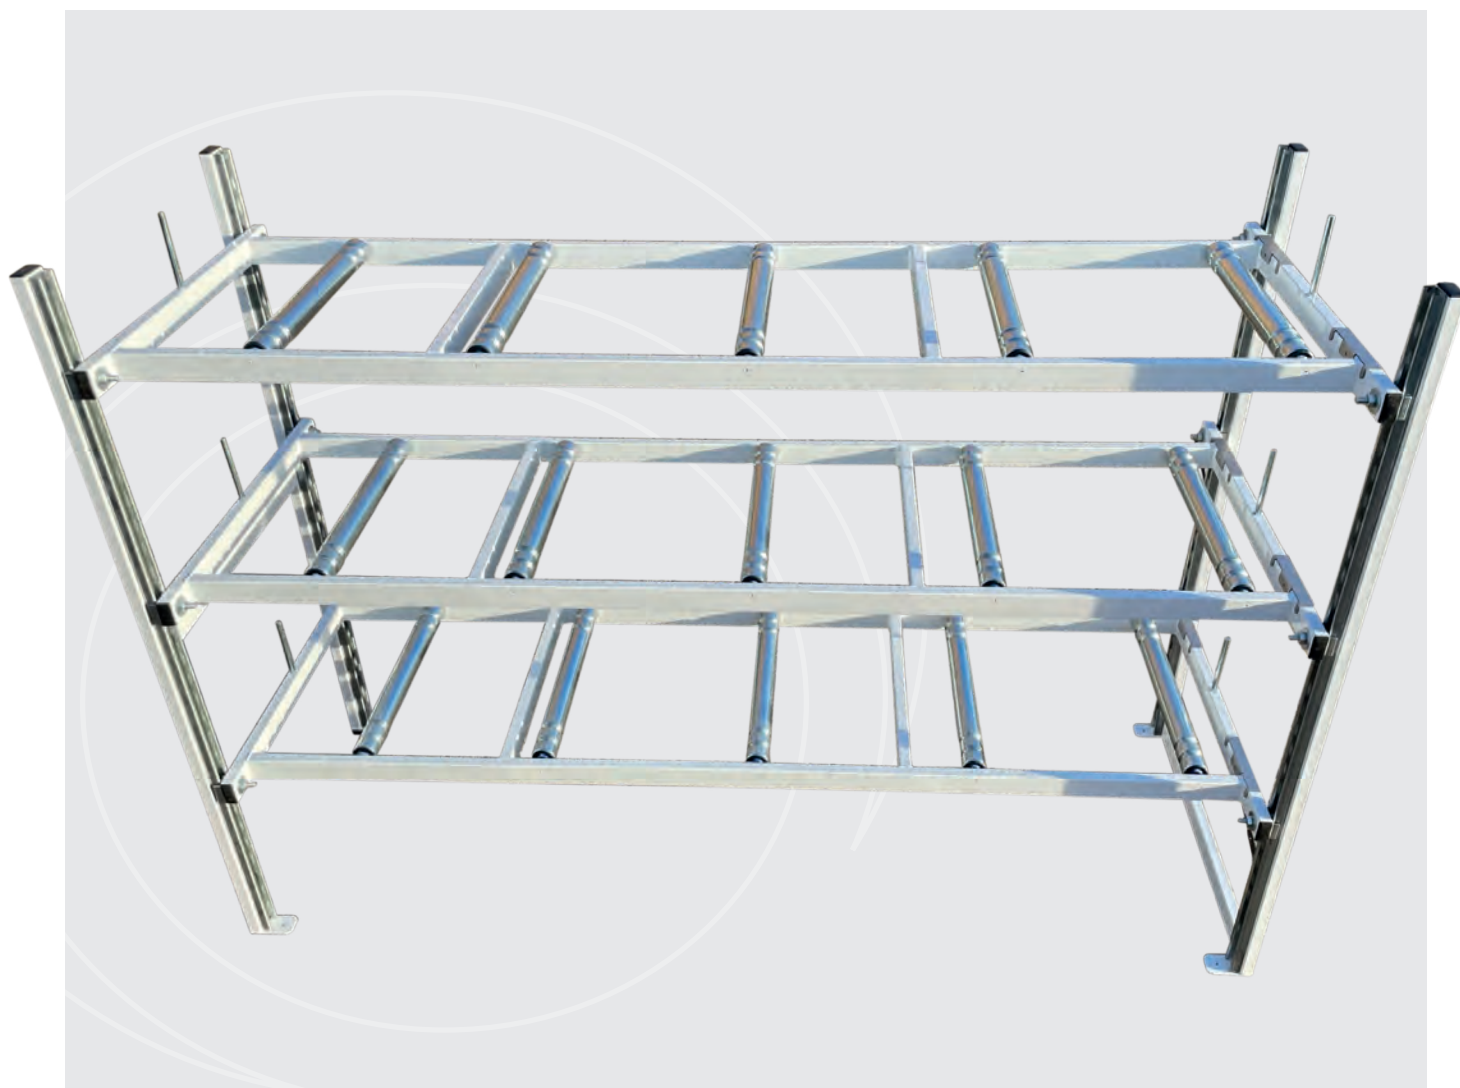

The clue is in the product name when we say 'Twigg Adjustable Racking'...

We have utilised our proven rack shelf design and fitted it to a track system to provide our Customer with complete flexibility on how best to store the deceased.

So flexible is the design, you could initially buy a 3 tier system and then add additional shelves at a later date as your capacity demand increases.

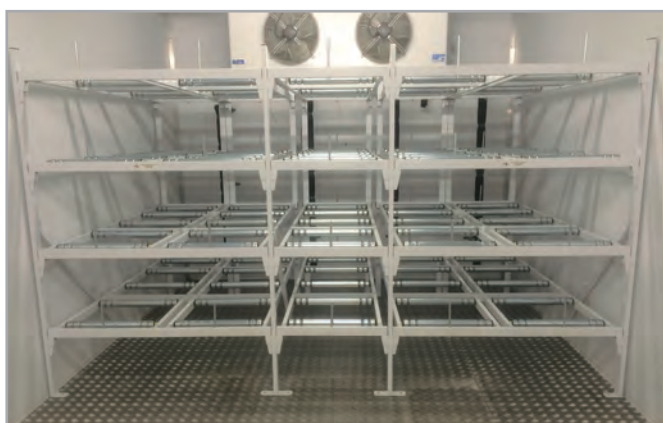

- Assembled in a matter of minutes.
- Freestanding with a completely solid structure.
- Wheels can be fitted to make the racking portable.
- Shelves can be independently adjusted.
- Stores both Coffins and Trays alike.
- Complete flexibility on what height you wish the shelf to sit at, there are no preset shelf heights.
- Additional shelves can be added at later dates with ease, no need to buy the whole system again.
- There are no dangerous stub roller set ups to contend with.

This racking is the new way forward for your Mortuary storage needs. All racking is made bespoke at no extra cost so we can design this system specifically to suit your requirements.

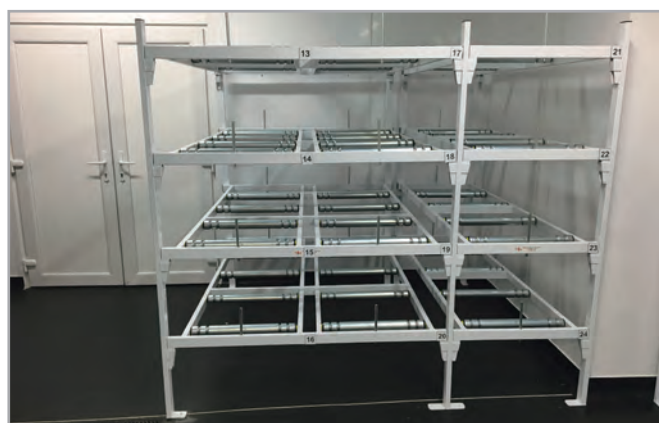

STORAGE RACKS & TRAYS

Storage Racks

2 Double Width 4 Tier Racks with a centre single rack to allow servicing of chiller unit - size made to suit

Double Width & Single Width Rack providing 4 extra spaces

4 Tier Double Width Rack - size made to suit with storage for trolley underneath

Rack made to suit giving Customer 4 extra storage spaces plus storage for the trolley

Storage Trays

Twiggs offer a choice of Stainless Steel Trays to compliment the racks we manufacture.

Available with (To NHS Spec) or without plugs, end loading, side loading and a choice of widths starting at 560mm, semi obese 660mm, obese 750mm and extra obese 850mm.

With plug (NHS Spec)

Without plug

STORAGE RACKS

2 Tier Rack - size made to suit

3 Tier Rack - size made to suit

4 Tier Rack - size made to suit
(shown with optional wheels)

All racks can be stored as flat pack
when not in use

All of our Racks are made bespoke to suit your set up.

Every rack system shown has been made to suit our Customer's requirements. Not only do we ensure that storage space is maximised but features such as storing trolleys under racks when not in use can be incorporated into the design.

The clever use of floor racks ensures every square inch of storage is maximised and people are stored properly on trays or in coffins.

- All Racks can have castors fitted if required.
- Full width rollers allow both tray & coffin storage.
- Sizes made bespoke to suit your set up.
- Assembled in less than 2 minutes.
- Suitable for Funeral Homes, Hospitals & Crematorium's.
- Through racks available to allow loading from either end.

Double Width Racks
with Floor Rack

Practical
Coffin Storage
with varying
shelf depths

COLD ROOM STORAGE RACKS WITH A DIFFERENCE

Coldrooms are great for storage purposes but without any Twigg storage racks the amount of storage available may be limited - until now that is!

These two Twigg Storage Racks were manufactured by Twiggs for installation at a busy Independent Funeral Home in the North East. Both systems are in the same coldroom and are located at either end.

The racking system in the picture on the left maximises empty space when Coffins are stored in coldrooms on Twigg Biers. Effectively one Coffin/Bier space now provides storage for 3. Coffins on Biers can be stored safely underneath the shelves allowing dignified storage.

The shelves are fitted with ball transfer units to allow up to 3 Coffins per shelf to be stored. We've even designed it so stretchers can fit underneath should the need arise.

The rack system in the picture on the right is the Triple Bay Rack with a single obese bay located on the right hand side. Previously the Customer only had storage for 9 in this space. We've provided storage for an additional 4 plus an obese bay. Total storage now 16.

We can adapt
and manufacture
anything to suit your
requirements.

¹Call us today to see how we can help
to increase your storage capacity.

COMPACT LOADER

The Compact Loader is designed to fit between the practicality of a normal 3 tier scissor lift trolley but also the usability of the now ubiquitous Universal Loader.

The ethos behind the Compact Loader is to service a 3 tier storage rack, yet whilst also providing a piece of equipment suitable for use in a Mortuary or Chapel Of Rest.

When fitted with the pelmet framework (See below) the Compact Loader is essentially a larger Universal Loader allowing a Twigg made velvet pelmet to hide the framework.

When the Top Bed drops away underneath the Coffin in the same way it does on the Universal Loader, it provides for a safe and secure means of viewing or transporting a Coffin from room to room.

Available in your preferred colour the Compact Loader has proven to be a hit.

COMPACT LOADER

Length: 1485mm

Width: 685mm

Closed Height: 400mm

Fully Extended: 1450mm

Weight: 134kg

PORTABLE COFFIN LIFTER

The Twigg Portable Coffin Lifter now leads the way with operator safety and overall practicality.

Primarily designed to fit under the deck of a Hearse or in the rear of a Private Ambulance the Portable Coffin Lifter is equally at home in your funeral premises as it is on the move.

We have carried all the safety features of our larger models and put it into something on a smaller scale to provide increased flexibility of use. Whilst this new lifter might look like a copy of what is already available in the market, we can assure you it is not. Designed from

the ground up, there are no hand trap points on the top bed or other framework which is important for both Operator safety and compliance with CE Regs.

Leading rollers at either end of the lifter allows coffins to be loaded with ease without any framework obstructing the loading procedure. Streamlined rounded lifting handles on the base prevent injuries to ankles during use. These handles are also replicated on the top bed to provide ease of use and mobility for the Operator.

PORTABLE COFFIN LIFTER

Dimensions with 150mm wheel fitted	Features	Options
Length: 1280mm	Powered by a 12v Electric Actuator based system	Extendable top bed if required
Width: 625mm	Foot pedal operation reduces contamination	First Call Stretcher attachment
Closed Height: 310mm	Rubber rollers 2" diameter grooved 14" centres – wide top rollers available	Handset operation in lieu of foot pedal
Fully Extended: 1110mm	CE Safety Certified	
Weight: 60kgs	Model for S.W.L. 200kgs (32 stone)	

UNIVERSAL LOADER

The Twigg Universal Loader has proved to be a huge hit with Funeral Homes, Hospitals and Crematoriums alike.

The Universal Loader is unique in that it is small, robust and is very easy to manoeuvre. It has all the safety features of our larger models but is designed to operate on a smaller scale. The best thing about the Universal Loader is its ability to lift 320kg / 50 stone with great ease, especially from a unit which only weighs a mere 70kg itself!

Powered by an electric actuator the Universal Loader operates in almost total silence meaning it can be used in Chapel's of Rest and Crematorium's providing total dignity for the deceased. Optional pelmets made by Twiggs are available in any colour and are designed to work seamlessly with the loader so they can remain in situ the whole time. The integral charger means there are no unsightly wires or battery chargers to contend with.

The Universal Loader is designed to work with trays, coffins and stretchers and can be used to unload/load stretchers/coffins from removal vehicles/hearses and is suitable to be used with a 2 tier rack. The extended top bed version is designed to bridge the gap between the main loader body and the vehicle bumper to assist the Operator when in use. Stretcher attachments are available making this extremely practical piece of equipment.

Scale Units can now be fitted to all Universal Loaders making this the perfect choice.

Standard Universal Loader - Up

Standard Universal Loader - Down

Long Nose Universal Loader - Up

CREMATORIUM UNIVERSAL LOADER

Our Crematorium Universal Loader is an extension of the Universal Loader range. The design and function is exactly the same as the standard Universal Loader yet the wheels are designed to negotiate door thresholds, loose terrain and tarmac/paved surfaces with ease.

The gloss black paintwork is in keeping with the Chapel of Rest environment and optional Velvet Pelmet made by Twiggs can be purchased to add the finishing touch of class to the Loader.

Again this Universal Loader is designed to lift 320kgs / 50 stone and does so with ease. Principally this unit is designed to unload Hearses and is powered by the same electric actuator so smooth quiet movement

during use is guaranteed. A long nose version of this Loader is available as well to bridge the gap between the trolley and the vehicle bumper.

Options such as handles which are stored within the Loader frame itself make moving the largest of Coffins easy and dignified. Wider units can be made to accommodate the larger Coffin if required. Available with scales.

CREM UNIVERSAL LOADER

Dimensions as above with 8" wheel fitted

Length:	1000mm
Width:	665mm/590mm (w/o side handles)
Closed Height:	605mm

Weight:	77kg

UNIVERSAL LOADER WITH PELMET

Dimensions with 150mm wheel fitted

Length:	1000mm
Width:	665mm/590mm (w/o side handles)
Closed Height:	540mm
Fully Extended:	1215mm
Weight:	70kg

LONG NOSE CREM UNIVERSAL LOADER

Dimensions as above with 8" wheel fitted

Length:	1285mm
Width:	665mm 590mm (w/o side handles)
Closed Height:	605mm
Fully Extended:	1275mm
Weight:	82kg

TRANSFER TROLLEY / VIEWING TROLLEY

The Twigg Transfer Trolley.

Made bespoke to suit the set up required. The example pictured is made for an Independent Crematoria Group and features a beautifully finished oak top.

The Twigg Viewing Trolley.

Comes with steel bearing rollers as standard with two roller locks. The Trolley can be fitted with or without a velvet pelmet manufactured by Twiggs.

The Small Remains Cooling Trolley.

Designed to allow small remains furnace trays to cool off. Fitted with handles at either end this practical trolley can double up as an Ash movement trolley as well.

CREM LONG TOP HYDRAULIC CHARGING TROLLEY

The Twigg Crematorium Long Top/Nose Hydraulic Charging Trolley has been around for a number of years now and still remains the firm favourite amongst many crematorium staff.

This trolley has no fancy bells and whistles to go wrong - instead it is simple, easy to use and works every-time ensuring staff are able to charge accurately.

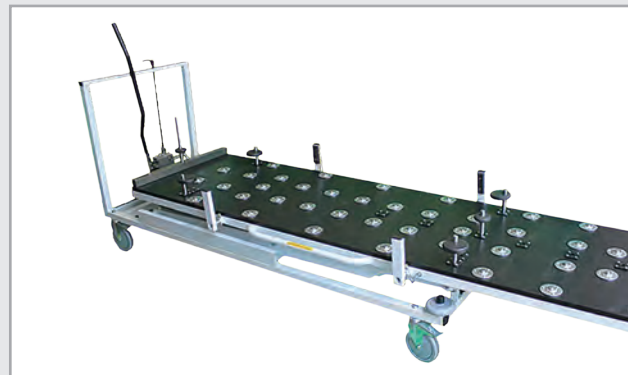

These trolleys come with a minimum 285kg /45 stone safe working load for the manual pump and 320kg /50 stone for the electric pump. A R Twigg are the only manufacturer (at time of print) to produce a crematorium charging trolley capable of lifting 450kg /70 stone and now there are several of these trolleys located at crematoriums around the UK. Nose lengths made to suit your setup at no extra cost.

Since 2012 Twiggs have made different variations of these Long Nose Trolleys to suit the needs of the customer.

The option for a ball transfer top beds has proved to be popular allowing crematoriums to adapt with the storage of bodies overnight, loading coffins on to fixed charging units sideways and moving heavy caskets with ease.

We are happy to design and manufacture any trolley to suit any set up so please do not hesitate to call us.

MANUAL BODY HOIST & COFFIN STANDS

Stainless Body Hoist (Made to Order)

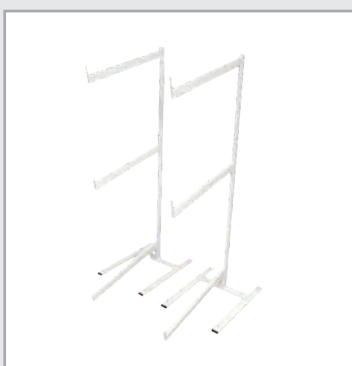

Our robust Hydraulic Body Hoist eliminates heavy lifting. Our new low level version is also available.

Capable of lifting 200kg / 32 stone the Twigg Body Hoist is a proven design.

The adjustable straps fitted to the cradle enable the Operator to manually adjust the position of the Body. This ensures movement from Tray to Coffin is conducted in a dignified manner whilst minimising the risk of a lifting injury.

STANDARD BODY HOIST

Length:	1232mm ¹

Can be made bespoke in both size & colour	

¹Base frame is made wider if being used with our underslung electric trolley

²Bottom arm length can be made longer

BIERS: 4 SQUARE LATTICE

Often Imitated
Never Bettered!

The 4 Square Lattice was designed in the late 60's and its design patented by Albert Twigg.

The 4 Square Lattice still remains a popular Lattice Bier today and is finished to the same high standards as both the Casket and Standard Lattices.

Available with both long and short handles this 4 Square Lattice is designed to fit into small spaces which cannot accommodate larger Lattice biers.

Complete with black leatherette cover. Extra Scissors available to increase Lattice length. Velvet Covers made to suit with handle slots.

4 SQUARE LATTICE BIER

Open Dimensions	Closed Dimensions
Length: 845mm	Length: 320mm
Width: 535mm	Width: 280mm
Height: 635mm	Height: 780mm
Safe Working Load: 200kg	
Weight: 18kg	

BIERS: STANDARD LATTICE

A R Twigg & Son are the creators and the original manufacturer of the infamous Stainless Steel Lattices. Designed by Albert Twigg himself in the early 60's, Twiggs held two patents protecting the copy of his successful design.

Our Lattices have an aura of quality around them and so they should after 68 years! Assembled from scratch, polished twice it takes nearly 3 weeks to make a single Lattice such is our manufacturing process. It is because of this **Twiggs do not make Lattices for anyone else.**

The Chrome braked castors are now fitted as standard. We have exclusivity on these having spent 2 years trying to source the right wheel to compliment our excellent product.

Available with long or short handles these Lattices are still made in-house at our Factory today. We can also increase the frame height if required to make the Lattice taller/wider.

Safe working loads from 200kg / 32 stone to 320kg / 50 stone are available depending on variant.

Comes complete with black leatherette cover. Extra Scissors available to increase Lattice length. Velvet Covers made to suit with handle slots.

STANDARD LATTICE BIER

Open Dimensions	Closed Dimensions
Length: 800mm	Length: 165mm
Width: 535mm	Width: 535mm
Height: 635mm	Height: 787mm
Safe Working Load: 200kg or 320kg if heavy duty	
Weight: 17kg	

BIERS: CASKET LATTICE

The Casket Lattice was designed in late 2015. It has been designed to fill a gap in the market which was once occupied by industrial looking Lattices.

For Twiggs it was an easy product to manufacture as it is entirely based around the successful Standard Lattice with the only differences being its width and length.

With the size of Coffins increasing the Casket Lattice provides the perfect solution. It is a quality product that is well made, it gleams in the sunlight looking smart and professional. Comes complete with leatherette cover as shown. Different sizes can be made to order. Velvet Covers made to suit.

Often Imitated
Never Bettered!

4 SQUARE LATTICE BIER

Open Dimensions	Closed Dimensions
Length: 1135mm	Length: 190mm
Width: 710mm	Width: 710mm
Height: 635mm	Height: 785mm
Safe Working Load: 320kgs / 50 Stone	
Weight: 24kg	

BIERS: FIXED STAINLESS OR PAINTED

Nearly every Funeral Home in the UK has at least one Twigg Fixed Bier in it!

Twiggs have introduced Stainless Steel Biers which have the same dimensions as the Painted Fixed Biers. We have also introduced Extended Length versions of

these Biers as some customers prefer longer Biers. This along with the square shoulder Biers provides a Bier for every occasion.

Standard Fixed Bier

Stainless Fixed Bier

STANDARD/STAINLESS FIXED BIER

Dimensions

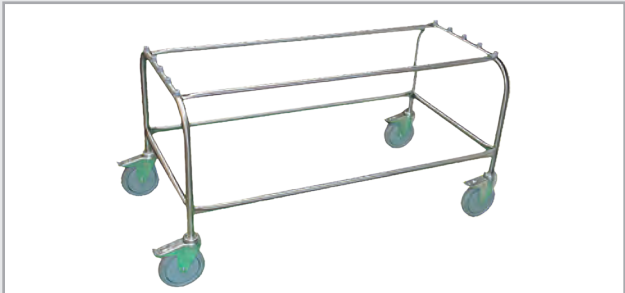

Length: 889mm	Height: 635mm (5" wheel)	Width: 482mm
Weight: 8kg	Safe Working Load: 200kg-450kg	

The Twigg Extended Fixed Biers are available in any length or width.

As a standard they are 482mm wide with a length of 1190mm. We're happy to make any Bier bespoke to suit your requirement.

We make Velvet Bier Covers to suit every Bier we manufacture.

We do not make covers for anyone else and Twigg Covers fit our products correctly without any sagging!

Extended Fixed Bier

BIERS: ROLLER TOP & SQUARE TOP

Twiggs Roller Top Biers.

Available in both end loading and side loading format. They come in either stainless steel or powder-coated mild steel variants. Both can be fitted with a choice of wheels to suit the operating conditions.

Fitted with two positive locking catches these Roller Top Biers make moving coffins easy. They are especially useful in situations where there may only be one operative available to move coffins around.

The Twigg Square Top Biers.

Designed to take up to 450kg¹. Made in either stainless steel and powder-coated mild steel these Biers are made properly so our velvet covers fit perfectly without sagging.

Velvet covers in all shades are available and we can even use velvet to suit your company colour scheme. Rubbers can be fitted to the outside of the cover to help to prevent wear.

4 SQUARE LATTICE BIER

Dimensions

Length: 810mm	Height: 620-675mm ¹	Width: 540mm
Weight: 9kg	Safe Working Load: to 450kg ¹	

¹Dependent on type of wheel fitted.

VELVET FIXED BIER COVERS

We have over 30 different shades of high quality Velvet to choose from. Whether it be to fit one of our Biers or another design. Twigg Biers are a speciality! We also fit lining to the ends of our Bier Covers to prevent unnecessary wear.

Your Choice.

We offer a choice of gold or silver braid/tassel. Some customers prefer to have one or the other or completely without. Anything is possible. We will also make Covers for Biers with material supplied by you the Customer so as to match the decor of your Funeral Home/Chapel of Rest.

VELVET TRESTLE COVERS & TRESTLES

With over 30 different colours to choose from we can manufacture any Trestle Cover to suit your requirements.

Available with or without Crosses, a choice of gold or silver braids/tassels or just plain. Our Trestle Covers are lined and are supplied as a pair.

- We can make any Trestle Cover bespoke to suit, even if one trestle is larger than the other!
- We are able to supply Trestles direct from the Manufacturer to your door.
- Made in the UK these light oak trestles are made from Wood that is responsibly sourced by our supplier.
- Trestle Carry Bags made from Cordura designed to keep your Trestles looking like new.

VELVET COFFIN PALL / PM VIEWING COVERS

We have over 30 different shades of high quality velvet to choose from to make Coffin Palls bespoke to suit whatever colour you wish.

All Palls are fully lined and we can offer a choice of gold or silver braid/tassel. Some customer's prefer to have one or the other or completely without. Anything is possible. We will also make Pall Covers with material supplied by you the customer so as to match the decor of your Funeral Home/Chapel of Rest. Our standard Coffin Pall size is 9ft x 4ft and we can make them bespoke if required.

We are happy to make Post Mortem viewing covers from any velvet you require. All of our Velvet is fully lined with a washable waterproof liner to prevent contamination to the Velvet itself.

These covers can be made larger to ensure the body and the Tray/Trolley is hidden discreetly. Please call to discuss sizes.

WEIGHING SCALES

With obesity becoming an ever increasing problem it is important to know what your clients weigh.

So why is the Twigg scale system better than what our competitors are selling?

- Portable - Can be moved around your building or from site to site.
- Roll on/Roll off design.
- Does not take up valuable floor space by having to be setup all the time.
- Can be hung on the wall, placed on a shelf or stacked when not in use.
- Width can be adjusted to accommodate both Stretchers and Biers alike.
- Optional Printer & Carry Bags available.
